1. #565 Permettre le lancement de Speakernext par Intent (updated autoStartProfile with new features)

2019-10-21, v2.1.2.506

1. Removed VoiXtreme Engine command restrictions

2019-09-12, v2.1.2.505

1. #854 Create a text file with detailed version when launching

2019-09-05, v2.1.2.504

1. #880 Included Honeywell barcode types with the Intent Scanner

2019-09-02, v2.1.2.503

1. Bug fix, BT headsets was not unpaired when receiving a CLOSE command (*BT Pairing must be version 7.0.3.552+*)

2019-08-13, v2.1.2.502

1. Fixed bug in the LoggerService

2019-08-05, v2.1.2.501

1. Added silentMode option when starting from command line
2. The secret package view is now opened from the Toolbar and works in both LANDSCAPE and PORTRAIT
3. Implemented the Jbluetooth.onAtOpen option
4. When re-selecting an active profile you get asked if to restart the session or continue with the current one.
5. When opening SpeakerNext Profile Selector, all active scanners will be released.

2019-07-29, v2.1.2.500

1. Logcat function introduced
2. Added new functions to know when scanner is lost/re-connected
3. Fixed bug to check if VoiXtreme Engine was alive or not
4. Misc minor improvements

2019-05-30, v2.1.1.506 (version only exist at Auchan)

1. Bug fix; When "voixtreme" folder was missing, still tried to copy files without showing an error message.
2. Bug fix; Status was not sent for command <OPENKB> and <OPENQA>
3. Bug fix; If Calibrate started and voixTreme did not initialize correctly, the vocal engine gave the wrong status: running.
4. Bug fix; If Scanner APP wasn't installed, SCANNER_STATEKB/QA did not respond
5. Added FileProvider management for treatment of local Web pages on the device.
6. Added IntentScanner section in _snx_scanner_configuration.jcf.
7. Added "CloseOnSelect" in _snx_configuration.jcf. (close SpeakerNext after profile was chosen)
8. In the main Activity the profiles listed are now sorted alphabetically
9. Start a profile automagically through StartActivity adding the String parameter "autoStartProfile".
10. Added flag FLAG_RECEIVER_FOREGROUND to all Broadcasts sent

2019-05-13, v2.1.1.505

1. Bug fix; SpeakerNext did not start correctly in landscape mode

2019-02-27, v2.1.1.504

1. Tnx Barscanner now sends "SDK" in the FILTER field, this so we know if to ignore or not status when using two scanners simultaneously.
2. Added new way of detecting if the VoiXtreme Engine service is running or not, (could fail on some devices)
3. Added "Bluetooth" parameters in order to be able to deactivate Bluetooth when using the command "CLOSE"
4. Bluetooth is turned off when entering the select profile menu
5. Fix bug with status (alive) check of the VoiXtreme Engine service
6. Added APP version number at the bottom of the screen (portrait mode only)
7. We now accept using two scanners (SDK must be Internal)
8. Added "Commands" in the SNX configuration file, only valid command at the moment is COPY

2018-11-13, v2.1.1.503

1. Implemented SCANNER support

NOTE: For the scanner part to work correctly you must use BT Pairing v7.0.3.536+, Barscanner Honeywell, v3.0.3.606+
