

In the `_tnx_profile.jcf` file, set the `Scanner.Sdk.On` and `BluetoothSPP.On` parameters to false:

```
"Scanner": {  
  "Sdk": {  
    "On": false,  
    "Readers": [  
      ...  
    ],  
    ...  
  },  
  "BluetoothSPP": {  
    "On": false,  
    "Filter": "",  
    ...  
  },  
  ...  
}
```

Configure scanning through Intent in the same file (`_tnx_profile.jcf`)

```
"IntentScanner": {  
  "Action": "com.android.server.scannerservice.broadcast",  
  "Extra": "m3scannerdata",  
  "CodeType": "m3scanner_code_type",  
  "HasCategory": false,  
  "Category": ""  
}
```

configure in M3 device the Intent output as follows:

- Set the Intent Action as `com.android.server.scannerservice.broadcast`
