	- The test is old, we recommend using Scanner Type 111 (not tested) - Sometimes it is necessary reading the pairing barcode twice. Build number 02-13-15.00-OG-U14-STD (May 16, 2019)				

Android Nougat (7.x) - <a href="#">No more tested on this version</a>

## Recommendations:

- Some devices are not available for testing, despite this, we recommend the use of Scanner Type 111
- Use the Filter parameter as much as you can. It will be easier to establish the connection between devices.

## Notes:

- On pairing perform, it is connected and disconnected once, but then connects automatically again.
- Vysor app installed at the device may cause the scanner to lose connection
